NA	Crave InfoTech	SAP Work Manager 6.2 with Meter Management	Android	<p>SAP Work Manager with Meter Management is a comprehensive mobile solution for the automation of field service processes. Regardless of connectivity, SAP Work Manager with Meter Management allows remote employees to access, complete, and manage their assigned Tasks and service requests via mobile devices. The Meter Management add-on component for Work Manager helps utility companies to integrate meter data management systems with SAP back-office applications. The solution is designed to connect customer usage data that had been collected from meters with billing, customer care, and other operational and business applications from SAP. It adds the following functionality to the core Work Manager Meter Management Application:</p> <ul style="list-style-type: none"> • Reconnection/Disconnection • Move In/Move Out • Replacement • Meter repair • Periodic Reading • Install Meters • Remove meters etc 	Utilities	TC75, MC9200	Zebra Enterprise Validated

Region	Partner	Application	Platform	Description	Verticals	Zebra Product	Program Status
NA	Take Supply Chain	Gemini Series	Win Mobile	barcode labeling capabilities. It integrates with Oracle® ERP and provides the ability to track, trace and control the inventory in real time. It expedites and extends data collection in key functions within receiving, inventory, manufacturing and shipping to accelerate data flow for better decision-making.	Retail, Manufacturing	MC9200	Zebra Enterprise Validated
NA	Zebra Technologies	Enterprise Browser Demo	Android	Enterprise Browser is a powerful, next generation industrial browser enabling developers to build feature rich web applications that integrate seamlessly with the features in Zebra Technologies' Mobile computers and peripherals – such as barcode scanning, signature capture, printing and more. Enterprise Browser applications leverage standard web technologies (HTML5, CSS, and JavaScript) to run and integrate with virtually any Zebra devices. With support for legacy APIs used in PocketBrowser and RE Shared Runtime, Enterprise Browser is the ideal path forward for developers migrating legacy web based applications to newer devices or creating new highly-graphical applications. Enterprise Browser features will speed up your application development time, reducing costs and making the transition to next generation devices and operating systems fast, easy and affordable. Built from the ground up around best-in-class development practices and designed to support new operating systems and devices, Enterprise Browser is an entirely better way to create web based enterprise applications.
