NETBOOK PRO USB ACTIVESYNC CABLE INSTRUCTIONS

I. Installation

The NETBOOK PRO can use either a USB ActiveSync Cable or an RS-232 ActiveSync Cable. Units identified with a "USB / RS232" on the left side rubber door have the USB feature. This NETBOOK PRO includes a USB ActiveSync Cable only.

Figure I NETBOOK PRO USB ActiveSync Cable

Microsoft[®] ActiveSync will operate faster using the USB ActiveSync cable. For best performance, ActiveSync should be upgraded to at least version 3.7.1. Visit the Microsoft website to download the latest version:

http://www.microsoft.com/windowsmobile/downloads/activesync37.mspx

If you require an RS-232 ActiveSync Cable, you may order the NETBOOK PRO optional accessory, CA1030.

Optional Product Accessories

CA1030 - RS-232 ActiveSync Cable

CA1031 - USB ActiveSync Cable

2. Setup Instructions

Before the USB ActiveSync Cable can be used, the host PC must first run the Psion Teklogix USBSETUP.EXE program that is located on the user CD-ROM. This program will help the host PC identify the NETBOOK PRO. Follow the on-screen instructions, selecting NETBOOK PRO, ActiveSync and USB Mass Storage as options. After re-booting the host PC, the USB ActiveSync Cable should now function and be recognized by ActiveSync.

Psion Teklogix USB Setup (inf)	Psion Teklogix USB Setup (retry)
This program will make copies of the installation scripts (inf files) for the following class of drivers and update the copies with information specific to Psion Teklogix devices. To choose different scripts, click "Browse".	This program can also attempt to re-install the device drivers. If the previous attempt has failed or you attached devices before running this program, selecting appropriate drivers is recommended.
USB connection to Windows CE (wceusbsh.inf). Needed for connecting to a terminal via ActiveSync.	Choose from the list below which drivers you would like to retry.
Path: Files\MicrosoftActiveSync\drivers\wceusbsh.inf Browse	 ✓ USB connection to Windows CE (wceusbsh). ✓ USB mass storage (usbstor).
USB mass storage (usbstor.inf). Needed for connecting to a terminal running BooSt so that the Removable Disk is mapped in Windows Explorer.
